Summary

A full-stack developer with 3+ years of experience in IT software development, specializing in building high-quality web applications. Passionate about writing clean, maintainable code and continuously exploring emerging technologies to deliver seamless user experiences. Committed to collaborating with cross-functional teams to achieve high-impact results in technology-driven projects.

Technical Skills

Next.js, React.js, Vue.js, JavaScript (ES6+), TypeScript, Tailwind CSS, ShadCN, MUI, Node.js, Express.js, MongoDB, PostgreSQL, MySQL, Git, Testing, Jotai, Redux, I18N, Zod, RestAPI, Docker

Work Experience

Oddle - Frontend Developer   May 2024 - Present

Worked closely with senior developers to implement responsive designs and improve user experience.

- Built responsive UI & customer input forms, collaborating with the backend team for seamless API integration.
- Optimized performance, reducing page load time from 4.2s to 2.1s and boosting Core Web Vitals by 30%.
- Enhanced Timeline view using react-calendar-timeline, improving scheduling efficiency.
- Developed a booking time block selection feature, increasing engagement by 25% and reducing churn by 15%.

FPT Software - Full Stack Developer   May 2022 - May 2024

Worked as a full stack developer on multiple client projects, focusing on building scalable web applications using modern technologies. Collaborated with cross-functional teams to deliver high-quality solutions.

- Developed and maintained responsive web applications across 3 major projects (Miroku Accounting, Zuellig Pharma, Viettel Cyber Security System)
- Implemented Multi-language support (i18n) for seamless user experience in global markets.
- Optimized app performance using caching, lazy loading, and partial loading, reducing rendering time from minutes to < 3s.
- Increased test coverage to 92%, reducing post-deployment bugs by 60% through comprehensive testing protocols.

OpenCommerce Group - Frontend Developer   Jun 2021 - Nov 2021

Contributed to the development of user interfaces for various web applications. Worked closely with senior developers to implement responsive designs and improve user experience.

- Developed Vue.js applications for Shopbase, serving 10,000+ MAUs, maintaining a 4.8/5 user rating.
- Worked with designers to implement responsive UI, increasing mobile retention by 30% and reducing bounce rate by 15%.

Projects

Tripal ⬀   Mar 2025 - Apr 2025

A travel planning application that helps you organize your trips and manage travel expenses

- Built a React/TypeScript travel app with responsive design and modern component architecture using Vite, Tailwind, and shadcn/ui
- Engineered an automated expense-splitting system with real-time balance calculations and cross-platform sharing capabilities
- Implemented comprehensive trip management with dynamic categorization and multi-user expense tracking using Zustand state management

Resume Painter Preview ⬀   Feb 2025 - Mar 2025

Developed an simple drag and drop resume builder using Next.js with real-time preview functionality

- Developed a dynamic resume builder with React and TypeScript, featuring real-time preview, drag-and-drop section reordering, and PDF export functionality
- Implemented a modular component architecture using shadcn-ui and Tailwind CSS, resulting in a responsive and accessible user interface with customizable themes
- Built a robust state management system using React Context API to handle complex form data, with support for dynamic addition, updating, and removal of multiple resume sections (experiences, projects, education, etc.)

Queennest ⬀   Jun 2024 - Jul 2024

eCommerce Website for selling bird's nest products

- Developed a fully responsive eCommerce website with an intuitive UI/UX.
- Integrated Framer Motion for interactive animations and better user experience.

Certifications

- Upper Intermediate Global Software Engineer - FPT Software (2023)
- Front-End Web Developer Nanodegree - Udacity (2023)
- Top 30, Tiki Hackathon – Hacking Trail - TIKI (2022)
- Top 30, Web Coding Challenge - MindX x TopCV (2021)
- Third Prize, Code Intensive Hackathon - MindX (2021)
- First Prize, Code4EJS MindX Hackathon - MindX (2020)

Education

VNU University of Engineering and Technology   Aug 2018 - Dec 2022

Engineer's Degree in Computer Engineering
